OK Corral 9449 NE 48th Street Okeechobee, FL 34972

## SCHEDULE

Registration - 8:45 am

Tournament Warm-Up - 8:45-9:45am

Shotgun Start - 10:00 am

BBQ Lunch, Raffles and Awards Celebration - 12:30 pm

This is a family friendly event for all skill levels. Please feel free to bring your own gun or rent a range gun at \$10.

## PLAYER OPTIONS

- **Single Player - Early Bird \$175 | Regular \$200**

Includes tournament fees, golf cart, team ammo, ticket for lunch buffet at awards celebration

- **Foursome - Early Bird \$700 | Regular \$800**

Includes tournament fees, golf cart, team ammo, four tickets for lunch buffet at awards celebration.

- **Tournament Warm-Up - \$20**

Includes 10 rounds of ammo and 10 targets. Gun available at stand or use your own gun.

## SPONSORSHIPS

**All sponsors will receive signage at the tournament in addition to recognition on the PBACCA website and event promotions.**

**Title Sponsor - \$2000**

**Gun Sponsor (multiple) - \$850**

**Station Sponsor (multiple) - \$175**

**Breakfast Sponsor (2)-\$1000**

**Lunch Sponsor (2) - \$1500**

**Yeti Sponsor (multiple) - \$525**

**Cart Sponsor (2) - \$350**

## President's Perspective

Robin Worrell

### Don't Forget this Fun Event!!

PBACCA in its ongoing commitment to serve our hard working air conditioning community has, for the FIRST time, organized a "Sporting Clays Shooting Tournament".

This fun event is scheduled for Saturday, February 18. (See information in this Plenum) We are hoping everyone attending will have a blast (pun intended!) If you haven't registered yet, please do so now. We don't want anyone to miss this fun filled event. Watch for other PBACCA announcements regarding upcoming meetings and more fun events.

Remember, membership in PBACCA has no risks, only benefits. If you are not satisfied, we will return your money.

Get involved / Join today!

We will see everyone on the 18th!

Regards,  
Robin Worrell

Palm Beach Air Conditioning Contractors Association (PBACCA) is an independent association serving the needs of the HVACR industry in Palm Beach County. PBACCA is not affiliated with the national group Air Conditioning Contractors of America (ACCA). The mission of PBACCA is to assist and better enable PBACCA members to acquire, serve, and satisfy their customers.

## Join Us For Our First General Meeting of 2023

**“At The Beach Club, Lake Worth Beach“**

**February 2, 2023**

**5:30 p.m. Check-in 6:30 p.m. meeting start's**

**GREAT Subject, GREAT Location, Have a GREAT Time and Socialize  
With fellow Contractors and Vendors**

**Bring a Non-Member Contractor friend or vendor and receive 2 FREE Drink Tickets each  
Let's Make This a Start to a Great Year**

**Guest Speaker: Patrick Lange of Business Modification Group**

**Building A Sellable Heating and Air Business**

**4 things to focus on today, to increase the value of your business when it is time to sell**

With all of the talk about buying and selling in the heating and air space, what does it mean for you and your business? What can you do today to help increase the value of your company? In this presentation HVAC Business Broker Patrick Lange shares what buyers are looking for in today's market, and 4 items you can focus on in your business to increase the value when it is time for you.

**Reservations are required**

**Reservation deadline Monday January 30, 5:00pm**

**Thursday, February 2 “The Beach Club”**

**One 7<sup>th</sup> Avenue North, Lake Worth, Fl. 33460**

**5:30 p.m. Check-in 6:30 p.m. meeting start's**

**No cost for meeting**

**Everyone will be ordering from the menu and paying for themselves**

**RSVP to Pam at [pripple@pbacca.org](mailto:pripple@pbacca.org)**

**\$250 Meeting sponsor / spotlight**

**(Includes 2 attendees and 5 minute Introduction at the podium)**

**Thank you February Meeting Sponsor!**

**Contact Pam for more Information: [pripple@pbacca.org](mailto:pripple@pbacca.org) or 561-585-3880**

## **APPRENTICESHIP INSTRUCTORS NEEDED**

Florida Air Conditioning Apprenticeship Association (FACAA) is hiring! We are planning for our Fall 2023 school year. We are looking for five new instructors. Below I've listed the items for instruction based on the individual year so you can get a feel for what each year teaches.

First year instruction includes: Safety, Math, Fundamentals of the HVAC trade, Gas Laws, Refrigeration Practices, Basic Refrigeration Cycle, Tools, Brazing and Soldering, Recovery and Evacuation procedures and EPA Certification.

Second Year instruction includes: Safety, Electrical & Electronic Terms, Define AC & DC Current, Describe Series & Parallel Circuits, Discuss Basic Motor Theory, Ohm's Law and Formulas to Solve Electrical Problems, Components of an Electrical Circuit, Common Circuit Controls in A/C Systems, Safety Devices Used in Electrical Systems, Procedures for Servicing Electric motors and components.

Third Year Instruction includes: Safety, Blueprint Reading, Mechanical & Architectural Drawings, Use Basic Drafting Tools, Draw Simple Prints & Sketches, HVAC Formulas, Florida Energy Code, Calculate Heat Loss & Gain using the ACCA Manual J, Equipment sizing using ACCA Manual S, Duct sizing using ACA Manual D, Airflow Testing and Psychrometrics.

Did you see something above that you enjoy even excel at? Why not join our team? My thoughts are, if I enjoy doing this wouldn't others be interested in teaching the next generation? I know there are very well qualified people in our trade who may want to share their knowledge. I can tell you from my 20+ years teaching it's a rewarding experience. The interaction with the students, the relationships you develop, it all worthwhile. I always enjoy it when a former student calls me to say "hey" or ask a question. To me, it makes me feel like I've made a difference. I also enjoy the feedback I get every Monday and Wednesday night from our apprentices. Our trade has so much to offer the next generation, I'm happy to share in that. I believe you will have a good time interacting with your class while sharing your knowledge and experience when you decide to become an instructor for FACAA. Our classes meet each Monday and Wednesday night (September – April) from 6:30pm –

If you are interested, give us a call: 561.315.8187, or 561.644.5668

On behalf of everyone here at PBACCA, we would like thank you for participating in our Annual Trade Show over the past 30 Years.

With the challenges we have faced over the past several years. Have limited our normal gatherings, fundraisers, and events that help fund our local Association. PBACCA hasn't stopped working for its members and this year we have decided not to hold Air Show 2023.

***In lieu of the next year's Air Show we are excited to announce our  
1st Annual Sporting Clays Shoot.***

Please know how much we appreciate your continued support to our association and we hope you will participate in next year's sporting clays shoot! To be held at OK Corral 9449 NE 48th St. Okeechobee, FL on February 18<sup>th</sup> 2023

If at any time I can be of assistance, please contact me at 561-561-3880 or [priple@pbacca.org](mailto:priple@pbacca.org)

With great appreciation  
Pam

*Thank you*

## February 18, 2023

OK Corral 9449 NE 48th Street Okeechobee, FL 34972

### SCHEDULE

Registration - 8:45 am

Tournament Warm-Up - 8:45-9:45am

Shotgun Start - 10:00 am

BBQ Lunch, Raffles and Awards Celebration - 12:30 pm

This is a family friendly event for all skill levels. Please feel free to bring your own gun or rent a range gun at \$10.

### PLAYER OPTIONS

- **Single Player - Early Bird \$175 | Regular \$200**

Includes tournament fees, golf cart, team ammo, ticket for lunch buffet at awards celebration

- **Foursome - Early Bird \$700 | Regular \$800**

Includes tournament fees, golf cart, team ammo, four tickets for lunch buffet at awards celebration.

- **Tournament Warm-Up - \$20**

Includes 10 rounds of ammo and 10 targets. Gun available at stand or use your own gun.

### SPONSORSHIPS

**All sponsors will receive signage at the tournament in addition to recognition on the PBACCA website and event promotions.**

**Title Sponsor - \$2000**

**Gun Sponsor (multiple) - \$850**

**Station Sponsor (multiple) - \$175**

**Breakfast Sponsor (2)-\$1000**

**Lunch Sponsor (2) - \$1500**

**Yeti Sponsor (multiple) - \$525**

**Cart Sponsor (2) - \$350**

## TECHNICIAN'S CORNER

A couple of times a year here in south Florida, we have what the rest of the country might say is a "cool day," while we Floridians typically use the term "freezing," and on those days. We are reminded of a few controls in some systems that don't come into play the other 363 days. Those controls are the ones needed to maintain minimum head pressure. During the warmer months, we tend to work on keeping the head pressure down to maintain efficiency and longevity, but when it's cold out, the tables turn. Why do we have to maintain the minimum head pressure? The answer is to ensure proper refrigerant flow through our metering devices. TXVs, in general, require about 100-125 #s of pressure difference from the inlet side to the outlet to perform properly. Though some can maintain superheat with less pressure difference it's still very important. Too little pressure drop results in insufficient capacity and often wild swings in superheat. Too little of a pressure differential can be the result of low head pressure which occurs those couple of days I'm speaking of.

There are several ways to maintain sufficient head pressure, a few examples are the fan cycle control, a discharge bypass valve (also referred to as a Headmaster) or a simple thermostat.

**Fan cycle control.** This control is typically a simple pressure control that opens the electrical circuit to the condenser fan motor when the head pressure drops below the minimum requirement, forcing the head pressure back up into the correct operating range where the circuit will close again. This is sufficient control during mildly cool days but may not be enough when it's extremely cold. This control may be found on some air conditioners and lots of refrigeration equipment. The downside to this type of control is that the cycling of the condenser fan motor can shorten the life of the motor and the limited range of effectiveness as it may only be effective down to 50°F or so. We need to check the condenser fan; it needs to be a ball bearing type when used with this control. The upside to this one is the cost for sure.

Less often the use of a simple thermostat that is wired to open the circuit to a condenser fan motor as with the pressure control above. However, this control is simply sensing the ambient temperature to determine whether the fan will run or not. The downside to this application is that over time, our condenser coils may deteriorate or become dirty, and the head pressure may be higher than normal even on a cool day. Since this control is only looking at the ambient temperature and not pressure it will cycle the condenser fan off resulting in even higher head pressure. This control is usually only used when there are more than one condenser fan motors, and the control only shuts down one motor.

Another common control would be a Discharge bypass valve. Probably more commonly referred to as Headmaster Valve. This valve will automatically divert discharge gas directly into the receiver while simultaneously closing off the outlet of the condenser, this allows liquid to accumulate in the condenser coil causing the head pressure to rise by reducing effective coil space while using the excess liquid refrigerant in the receiver to feed the TXV. Once the head pressure returns to a normal range the valve will revert to normal operation where it will force all the liquid produced in the condenser coil into the receiver essentially refilling it. This action will repeat to maintain the required head pressure. This control is probably the most effective head pressure control and is effective down to -25°F. Something I hope never to see here. The downside is cost, the use of this type of head pressure control requires a significantly larger amount of refrigerant in the system to accommodate the low ambient conditions when we will need to have enough liquid available in the receiver and still be able to produce liquid in the condenser coil as well.

All three of the above controls are effective in maintaining head pressure to varying degrees but by far the headmaster is the best overall choice.

## Another Reason to Smile

### Know Your Animals

A guy spots a sign outside a house that reads, "Talking Dog for Sale."

Intrigued, he walks in. "So what have you done with your life?" he asks the dog.

"I've led a very full life," says the dog. "I lived in the Alps rescuing avalanche victims. Then I served my country in Iraq. And now I spend my days reading to the residents of a retirement home."

The guy is flabbergasted. He asks the dog's owner, "Why on earth would you want to get rid of an incredible dog like that?"

The owner says, "Because he's a liar! He never did any of that!"

# Become Certified

**PBACCA will provide a proctor upon  
request for onsite testing.**

The E.P.A. has established a Mandatory Technician Certification Program. Technicians are required to become certified under the mandatory program. Under the final E.P.A. rule, the sale of refrigerant will be restricted to certified technicians.

**For more information on EPA testing  
call Pam at 561-585-3880.**

**OUR MISSION:** *To assist and better enable  
PBACCA members to acquire, serve and satisfy  
their customers.*

## Apprenticeship Corner

### Need Qualified Technicians?

The next time you have an opening for a technician, call the local Apprenticeship office at 561-262-7523. They can help you find a qualified apprentice to hire and enroll in the local PBACCA sponsored Apprenticeship Program offered at Palm Beach Community College. You'll be sure your employee is being taught the right skills and acquiring the training to become a productive journey man.

*Another way  
PBACCA serves you!*
